 Mobile: +8801707589250

## OVERVIEW

Passionate **Software Engineer** focused on building responsive and scalable web applications using **JavaScript, React.js, Next.js, Tailwind CSS, MongoDB** and **Better Auth**, while continuously expanding backend expertise with **Node.js** and **Express.js**.

## SKILLS

|                   |                                                                                         |
|-------------------|-----------------------------------------------------------------------------------------|
| Languages         | : JavaScript (ES6+), HTML5, CSS3, C, Python                                             |
| Frameworks        | : React.js, Next.js, Tailwind CSS                                                       |
| Libraries         | : React Router, DaisyUI, HeroUI, Better Auth                                            |
| Database          | : MongoDB                                                                               |
| Dev & Build Tools | : Git, GitHub, VS Code, Vercel, Netlify, Render, JSON Server, Claude Code, OpenAI Codex |
| Familiar With     | : Node.js, Express.js                                                                   |

## PROJECTS

WanderLust  *Next.js, React.js, Node.js, Express.js, MongoDB, Better Auth, Tailwind CSS, HeroUI* Full-Stack  
Developed a full-stack travel booking platform with destination exploration, booking workflows, secure authentication, role-ready authorization and complete CRUD-based data management.

Dragon News  *Next.js, React.js, Tailwind CSS, DaisyUI, Better Auth, MongoDB* Open Source  
Engineered and deployed a modern news platform enabling category-based content discovery, secure authentication and a responsive user experience using Next.js and MongoDB.

BookNest  *Next.js, React.js, Tailwind CSS, HeroUI, Swiper.js, Animate.css, Better Auth, MongoDB* Open Source  
Developed a modern book borrowing platform implementing secure authentication, protected routes, user profile management, REST API integration and a custom-designed interface.

Keen Keeper  *React.js, Tailwind CSS, DaisyUI, React Router, Context API, Recharts* Open Source  
Built a friendship management platform featuring contact organization, communication tracking, and interactive analytics through dynamic data visualization.
